Restart

Restart & Clear Output

Restart & Run All

Reconnect

Shutdown

Change kernel

Kernel ⇨ Restart and Run All Cells

Run your own g

1. Initialize everything: F

2. Put your own values in the last cell and execute it ( Shift Enter ). After that, you can execute the cell over and over. You only have to reinitialize when you first load the notebook.

Open #localhost:8888/notebooks/00.00.how-your-grade-is-calculated.julia.ipynb# on this page in a new tab
